

Jurys Inn Islington Green Policy

'Jurys Inn Islington's energy policy focuses on every means possible to reduce our carbon footprint whilst sustaining a reliable, efficient and professional business model. To further enhance our efforts in cutting our CO2 emissions we have several recycling, energy saving and waste minimising practices in place involving all departmental units. We research and promote the use of eco friendly and fair trade products whilst minimising the use of hazardous and toxic substances. We have energy and recycling awareness information in all bedrooms together with various in house competitions and events in place, to promote further awareness. We are also proud to support local charities, and are involved in helping the needy in the Third World.'
