

We at Jurys Inn Manchester are working towards a Green Tourism Business Scheme accreditation

Responsible Visitor Charter

Jurys Inns Group has a proud tradition of delivering quality service to its customers. We have now joined the Green Tourism Business Scheme to also make your stay more environmentally friendly.

You can assist us in our environmental quest by:

- **Conserving Energy** – reduce energy consumption by turning off lights, closing windows and turning the heating down where possible.
- **Using Public Transport** – Manchester has excellent public transport links in and around the City Centre. Ask for a map and timetables at Reception. If your destination is close by, consider walking or cycling !
- **Using Local Shops** – Support our local shops and buy local products. Ask at the Reception desk for local markets and organic products.

- **Reduce, Reuse, Recycle** – Try and reduce any waste, avoid buying goods that are over packaged and take your own shopping bags with you or re-use plastic bags.
- **Being Water Wise** – Try and reduce the water you use by turning off the tap when you brush your teeth and only filling the kettle with enough water for what you need. Help us to save water by following our towel procedure and other water saving initiatives.
- **Respecting Nature** – When you are out and about, please respect our nature by not littering and using footpaths, cycle routes and road responsibly. If you wish to support our local nature and conservation projects, please visit the green display at our Reception desk.
- **Supporting Green Tourism Businesses** – Support other local businesses that have an environmental policy. For details visit www.green-business.co.uk

Please enjoy your stay with us ! If you have any “green” feedback or tips for us, please deposit your ideas in the green feedback box on our Reception desk.

Thank you for helping us save our planet !
